RESEARCH & INNOVATION EXPERIENCE

Founder & CEO | TatvaX Innovations Pvt. Ltd.

- Founded a climate technology startup translating research into scalable environmental solutions.
- Leading the development of TRITATVA, a biomimetic atmospheric water generation system inspired by nature and passive cooling principles.

JUL'26 – PRESENT

Innovate4Environment Fellow | WMG, University of Warwick

- Selected as an Innovate4Environment Fellow to collaborate on sustainability-driven innovation addressing global environmental challenges.
- Working with an international cohort to develop research-backed solutions integrating design, engineering, and systems thinking.

MAY'26 – PRESENT

MSME Incubatee | All India Institute of Ayurveda (AIIA)

- Selected under MSME Champions Scheme (Government of India) and awarded ₹14 lakh in grant funding to develop a dual-action, non-invasive healthcare device addressing myiasis in livestock.
- Leading product design, biomimetic research, rapid prototyping, and validation in collaboration with AIIA (Host Institute) and Central Tool Room & Training Centre (CNA).
- Translating research-driven innovation into a scalable solution for underserved rural and veterinary contexts with real-world impact.

APR'26 – PRESENT

SURE Design Research Intern | IIT Hyderabad

- Conducting design research under Dr. Prasad S. Onkar at the Department of Design.
- Led MSME design audits, branding systems, AI-assisted artisan platform development, and footwear photogrammetry research.
- Supporting innovation strategy, user research, and design documentation for industry and rural impact projects.

MAY – JULY'26

Global Finalist | Stanford Doerr School of Sustainability | IIT Bombay

- Selected among 3,000+ applications from 91+ countries, advancing from 56 regional teams to the Top 20 Global Finalists worldwide.
- Led structural and product design for TRITATVA, an atmospheric water generation system inspired by biomimicry and vernacular architecture.
- Collaborated with an international multidisciplinary team to develop, prototype, and pitch a sustainable system addressing global water scarcity.

NOV'25 – APR'26

Product Development Fellow | InventX 2025, IIT Jammu

- Selected among India's Top 60 student innovators for InventX 2025.
- Developed a biomimetic livestock healthcare device for myiasis (larval extraction) under a ₹40,000 prototyping budget.
- Executed 15+ rapid prototype iterations, conducted validation testing, and integrated user feedback.
- Winner of InventX 2025; progressed to patent filing & commercialization.

MAY – JULY'25

EDUCATION

Footwear Design & Development Institute (FDDI)

Bachelor of Design (B.Des), Product Design

2023 – 2027

Institute of National Importance under the Ministry of Commerce & Industry, Government of India

- Top 2% | Grade: 9.50 CGPA (10 scale)
- Product Design • Biomimetics • Healthcare Innovation • Systems Design

LEADERSHIP

President

Entrepreneurship Cell, FDDI Kolkata

- Leading entrepreneurship initiatives, startup mentorship, innovation programs, and interdisciplinary collaborations.

Author

Human Over Product

- Authored a book exploring empathy, systems thinking, and human-centered innovation through design.

PUBLICATIONS & PATENTS

Publications

Nano to Neural: Biomimetic Thermo-Responsive Camouflage Textiles for Intelligent Environmental Illusion
International Conference on Design Futures (ICDF), 2026

Intellectual Property

The Larva Extractor
-Patent Filed
TRITATVA
-Patent Pending

TECHNICAL EXPERTISE

Software

Rhino 3D • Fusion 360 • Adobe Illustrator • Photoshop • Premiere Pro

Research

Rapid Prototyping • CAD • User Research • Scientific Literature Review • Human-Centered Design
